Projects

WorkWave - Employee Management System | Live | Link **Nov 2025 – Present**

- Architected a full-stack EMS with 35+ RESTful API endpoints, implementing Role-Based Access Control (RBAC) and a dual-token JWT authentication flow (15-minute access, 7-day refresh) stored in PostgreSQL.
- Structured real-time collaboration features utilizing WebSockets (Socket.io) to power instant in-app notifications, live task status updates, and interactive comment threads without HTTP polling.
- Developed an automated analytics engine leveraging node-cron and Recharts to visualize team performance metrics, gamify productivity via leaderboards, and track GitHub repository statistics.

  Tech: React.js, Node.js, Express.js, PostgreSQL, JWT, bcrypt, Neon, Tailwind CSS, GSAP

FarmEasy - Agricultural Auction Marketplace | Live | Link **Nov 2025 – Jan 2026**

- Engineered an auction platform with 30+ RESTful API endpoints creating direct marketplace connections between buyers and farmers using WebSockets for concurrent live bidding with bid validation and farmer-controlled price locking.
- Designed 3-tier admin moderation pipeline (pending - approved - rejected) with Cloudinary image handling, streamlined auction scheduling based on product expiration, and asymmetric buyer profiles.
- Implemented dual-token JWT authentication, with email verification, Razorpay HMAC-SHA256 webhook validation for tamper-proof payment, and an event-driven reputation-based farmer rating system.

  Tech: React.js, Node.js, Express.js, MongoDB, Socket.io, Razorpay, JWT, Redux, Cloudinary

Web Nexus - OWASP Top 10 Vulnerabilities Learning Platform | Live | Link **Mar 2025 – May 2025**

- Created an interactive cybersecurity education platform simulating all 10 OWASP vulnerabilities (XSS, SQL Injection, CSRF, SSRF, Broken Access Control) with isolated sandboxed environments.
- Modeled 3-module architecture per vulnerability (Vulnerability - Prevention - Secure Simulation) with syntax-highlighted code demos, attack visualizations, and RESTful PHP/MySQL backend.
- Delivered secure authentication using bcrypt hashing, secure cookies, and session hijacking protection mechanisms.

  Tech: HTML, CSS, JavaScript, Tailwind CSS, MySQL, PHP, GSAP

Training

Techvanto Academy **Jun 2025 – Jul 2025**

Backend Development

- Built scalable RESTful APIs using Node.js and Express, implementing modular architecture and efficient routing.
- Applied dynamic React components with Zustand-based state management to handle real-time UI updates and data sync.
- Connected real-time communication features through Socket integration.

  Tech: NodeJS, Express.js, React, JavaScript, Socket.io, Zustand, MongoDB

Certificates

Master MongoDB: NoSQL Database Management by Udemy | Link Sep 2025

Deep Learning by NPTEL | Link Apr 2025

The Bits and Bytes of Computer Networking by Coursera | Link Sep 2024

Technical Skills

- **Languages**: C++, SQL, JavaScript, Java, C, PHP
- **Frameworks**: NodeJS, ReactJS, ExpressJS, TailwindCSS, Vite
- **Databases**: PostgreSQL, MongoDB, Firebase, MySQL, Supabase
- **Tools/Platforms**: Postman, IntelliJ, Kafka, Git, Github, Figma

Education

Lovely Professional University Punjab, India

Bachelor of Technology – Computer Science and Engineering; ***CGPA: 9.01*** Since Aug 2023

Holy Cross S. S. School Raipur, Chhattisgarh

Senior Secondary; ***Percentage: 87.0*** Apr 2021 – Mar 2022

Holy Cross S. S. Schooll Raipur, Chhattisgarh

Matriculation; ***Percentage: 88.0*** Apr 2019 – Mar 2020
