Mobile: +91-9131070827

Skills

- **Languages**: C++, JavaScript, Java
- **Frameworks**: NodeJS, Vite, React.js, Express.js, Tailwind CSS
- **Tools/Platforms**: JWT, Socket.io, Zustand, Figma, MongoDB, PostgreSQL, Github, Postman
- **Concepts**: REST APIs, DSA, OOP, OS, DBMS, Computer Networking
- **Soft Skills:** Perseverance, Adaptability, Creativity, Consistency, Team Collaboration

Projects

- **WorkWave - Employee Management System | Github** Nov '25 – Mar '26
  - Architected a full-stack EMS with 35+ RESTful API endpoints, implementing Role-Based Access Control (RBAC) and a dual-token JWT authentication flow (15-minute access, 7-day refresh) stored in PostgreSQL.
  - Structured real-time collaboration features utilizing WebSockets (Socket.io) to power instant in-app notifications, live task status updates, and interactive comment threads without HTTP polling.
  - Developed an automated analytics engine leveraging node-cron and Recharts to visualize team performance metrics, gamify productivity via leaderboards, and track GitHub repository statistics.

Tech stack used: React.js, Node.js, Express.js, PostgreSQL, JWT, bcrypt, Neon, Tailwind CSS, GSAP

- **FarmEasy - Agricultural Auction Marketplace | Github** Nov '25 - Jan '26
  - Engineered an auction platform with 30+ RESTful API endpoints creating direct marketplace connections between buyers and farmers using WebSockets for concurrent live bidding with bid validation and farmer-controlled price locking.
  - Designed 3-tier admin moderation pipeline (pending - approved - rejected) with Cloudinary image handling, streamlined auction scheduling based on product expiration, and asymmetric buyer profiles.
  - Implemented dual-token JWT authentication, with email verification, Razorpay HMAC-SHA256 webhook validation for tamper-proof payment, and an event-driven reputation-based farmer rating system.

Tech stack used: React.js, Node.js, Express.js, MongoDB, Socket.io, Razorpay, JWT, Redux, Cloudinary

- **Web Nexus - OWASP Vulnerability Simulation Platform | Github** Mar '25 - Jul '25
  - Created an interactive cybersecurity education platform simulating all 10 OWASP vulnerabilities (XSS, SQL Injection, CSRF, SSRF, Broken Access Control) with isolated sandboxed environments.
  - Modeled 3-module architecture per vulnerability (Vulnerability - Prevention - Secure Simulation) with syntax-highlighted code demos, attack visualizations, and RESTful PHP/MySQL backend.
  - Delivered secure authentication using bcrypt hashing, secure cookies, and session hijacking protection mechanisms.

Tech stack used: MySQL, HTML, Tailwind CSS, JavaScript, GSAP, PHP

Training

Techvanto Academy Jun '25 - Jul '25

Backend Development

- Built scalable RESTful APIs using Node.js and Express, implementing modular architecture and efficient routing
- Applied dynamic React components with Zustand-based state management to handle real-time UI updates and data sync.
- Connected real-time communication features through Socket integration.

Tech stack used: NodeJS, Express.js, React, JavaScript, Socket.io, Zustand, MongoDB

Certificates

- Oracle AI Database Certified Foundations Associate (Oracle) Sep '26
- Deep Learning (NPTEL) Apr '25
- The Bits and Bytes of Computer Networking (Coursera) Sep '24

Achievements

- **LeetCode Milestone:** Jun '26

  Solved 600+ algorithmic problems on LeetCode, improving proficiency in data structures and problem-solving.

  In top 10 percentile LeetCode Contest Ranking.

- **NPTEL - (IIT Kharagpur)**: Jan '25

  Top 5% of candidates; earned Elite Certificate with a final score of 80%.

Education

- **Lovely Professional University** Jalandhar, Punjab
  Bachelor of Technology - Computer Science and Engineering; **CGPA: 9.01** Aug '23 - Present
- **Holy Cross S. S. School** Raipur, Chhattisgarh
  Intermediate; **Percentage: 87.0%** Apr '20 - Mar '22
- **Holy Cross S. S. School** Raipur, Chhattisgarh
  Matriculation; **Percentage: 88.0%** Apr '19 - Mar '20
